Status of Claims

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Rick Toering on 2 August 2007.

2. The Application has been amended as follows:
Claims 10 and 27 have been canceled.
3. Claims 1, 3-9, 18, 20-26 and 35-37 have been allowed.

Reasons For Allowance

4. The present invention is directed to identifying data stored on a network. Claim 1 recites "generating, at the intermediary, a combined address that identifies both an intermediary address associated with the intermediary and an object address that is determined based on the request". To the Examiner this is merely hyperlinking. For example, Bezos et al. teach a user going to an

intermediary (i.e. associate) ('141, figure 1, item 100) and while at the intermediary the user goes to a webpage that advertises a book that he/she would like to purchase ('141, figure 6). To make a purchase the user clicks on a link on said webpage ('141, figure 6, item 608) which takes the user to a book seller webpage to purchase the book (figure 8). The Examiner is of the opinion that the intermediary webpage is generated by the intermediary's server, where the webpage displays the book ('141, figure 6). Hence, Bezos et al. teach a [webpage] address (figure 6) *"that identifies... an intermediate address associated with the intermediary"*. However, the [webpage] address also identifies the book's webpage or object address at the second website, therefore the prior art also teaches *"an object address"* and this address is *"determined based on the request"* as in order to properly redirect the user, the first website has to determine the book's webpage at the second website. The Board however, disagreed with the Examiner's assessment of the prior art and has determined that the intermediary (i.e. associate) address of the intermediary ('141, figure 1, item 100, figure 6) of Bezos et al. "is not generated at the associate and does not identify the requested object's address".

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- The Atlantic Monthly; July 1945; Vannevar Bush, As We May Think; Volume 176, No. 1; 101-108
- "Web-related applications power productivity and partnering", Doherty et al., Building Design & Construction, Oct 1996, v 37, Iss. 10, pgs 63-68
- Mayer discloses a system and method for voiced interface with hyperlinked information
- Desmond discloses hyperlinking wherein an address is modified at a device and a combined address is transmitted to a modem

5. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Calvin Loyd Hewitt II whose telephone
